Risk Assessment Practice & Principles Certificate

Introduction

A properly implemented programme of risk assessments can assist in the prevention of injuries, fatalities, property damage incidents and other losses.

The tutor led element of the programme is one and a half days in duration and will assist students in becoming familiar with legal requirements, the principles of risk assessments and the methods used when conducting them in practical situations.

In addition to the training programme students will be required to complete an assignment requiring some research and the preparation of a report which may take approximately three hours depending on individual circumstances and ability.

Target Audience

The Risk Assessment Principles and Practice Certificate is designed for managers, supervisors and all those who have a responsibility to conduct risk assessments.

Learning Objectives

It is anticipated that by the end of a course trainees will be able to:

- Conduct risk assessments (assuming they have the necessary technical knowledge)
- organise and implement a risk assessment programme where this has not already been started.
- participate in the identification of specific training needs for the activities being assessed.
- assist employers in meeting legal requirements and promote improved standards of health and safety within their organisation.

Additionally trainees will become aware of the limitations of their personal knowledge and experience and will know where to seek further information, guidance and assistance.

Candidate Criteria

Suitable candidates for the programme and assessment will need to have good standards of written and oral communication

Course Duration

One and a half days (0930-1630) plus the completion of an assignment (3 hours) submitted within 2 weeks of the course date.

E-mail support is also provided.

Please telephone for details of future dates and venues

Attendees

A maximum of 12 trainees to one instructor to be permitted on the course.
